17
18 summary = """
19 CySA+ and Security+ certified security analyst with 7+ years across
20 enterprise infrastructure, security operations, and application security.
21 Experienced in SIEM monitoring, threat detection, alert triage, incident
22 investigation, and detection engineering. I correlate telemetry across
23 endpoint, network, and log sources, tell operational failures apart from
24 real attacks, and respond to production-impacting incidents under pressure –
25 proven in a hands-on offensive and defensive (purple-team) home lab.
26 """
